

- **Heading:** Sprint 2 Report, Draw a Piece, February 13, 2016.
- **Actions to stop doing:** We should stop working on our eraser function for now since there are more important tasks that take precedence.
- **Actions to start doing:** Emailing the T.A if we need help on clarification on what we might be doing wrong. Making sure that the board gets updated properly
- **Actions to keep doing:** Keep telling each other about the obstacles we are facing and trying to help one another. Keep giving good descriptions to changes we have made to our files.
- **Work Completed since last Sprint:**
  - Download an image of the drawing on canvas.
  - Setting up database
  - Save uploaded pictures to database.
  - Controlling brush size with a slider.
  - Controlling brush color with a picker.
  - Setting uploaded picture to background on canvas.
  - Save uploaded background image to the database.
  - Creating a Project interface and not just a simple drawing canvas.
  - Associating Pictures to projects.
  - Listing out projects in the index page.
  - Setting up authentication to make projects public/private.

- **Work Not Completed:**
  - Saving a project to the database as well and not just on the local computer.
- **Work completion rate:** This was a much more productive sprint in comparison to the last one. We have the backbone of our project all set up now. The ideal work hours per day seems to be 4 hours, and we finish about 1 user task per day.
