

## Draw a Piece Release Plan

We mostly use this document to steer our sprints the direction we saw fit.

### Priority User Stories:

1. Get a simple canvas working with basic drawing features.
2. Setting up skeleton database code.
3. Uploaded an Image onto the canvas.
4. Be able to download the contents of the canvas.
5. Associate pictures to projects.
6. Version control and save states.
7. Picture cropping to match canvas without issues.
8. A project interface which lets us access multiple canvases.
9. Making sure project is properly saved through version control and save states.
10. Properly associating images with the corresponding images.
11. Being able to save the project image properly with all the images stitched together.
12. Private and public projects feature.

### Secondary User Stories:

1. CSS styling.
2. Comments section
3. Project Thumbnails
4. Brush slider, color picker and Eraser.
