

- **Heading:** Sprint 1 Report, Draw A Piece, January 27, 2016
- **Actions to stop doing:** We should probably spend less time on how our canvas looks and more on making it work the objective. Such as good variety of tools, multiple users, login authentication, etc.
- **Actions to start doing:** Emailing the T.A if we need help on clarification on what we might be doing wrong. Making sure that the board gets updated properly
- **Actions to keep doing:** Keep telling each other about the obstacles we are facing and trying to help one another. Keep giving good descriptions to changes we have made to our files.
- **Work Completed:**
  - Creating a basic drawing interface where one can draw.
  - Creating an eraser so that the user can erase.
  - Download an image of the drawing on canvas.
  - Setting up database
  - Save uploaded pictures to database
- **Work Not Completed:**
  - Controlling brush size with a slider
  - Controlling brush color with a picker.
  - Setting uploaded picture to background on canvas.

- **Work completion rate:** We completed 5 user stories across an estimated 15-17 hours of work time. The sprint lasted from 11 January to 27 January.
